

NLC Recalls Four Alcoholic Vodka Beverage Products

St. John's, NL November 17th, 2011- Newfoundland Labrador Liquor Corporation (NLC) today recalled four products from the Woody's line of alcoholic vodka beverages and suspended sales of these products. This recall is in response to the notification that there may be glass particles in some bottles.

The four products being recalled are:

-Orangetini (sku 10416)

-Pomtini (sku 5951)

-Woody's Sasparilla (sku 11178)

-Woody's Refresher (sku 11179)

The problem appears to be related to the bottling process.

"NLC has received confirmation that glass particles have been identified in bottles of some Woody's products in Manitoba. In the interest of customer safety, we have instructed all Liquor Store and Liquor Express locations in Newfoundland and Labrador to immediately remove these products from the shelves," explained Peter Murphy, Director of Merchandising, NLC.

We encourage all customers to return bottles of the aforementioned products to your local NLC location to receive a full refund.
